

## Plant Needs & Parts Song of the week

### Parts of the Plant

(To the tune of the Addams Family Song)

**PREVIEW  
DRAFT**

Parts of the Plant

Parts of the plant

(clap, clap)

Parts of the plant

(clap, clap)

Parts of the plant, parts of the  
plant, parts of the plant

(clap, clap)

There are roots

(touch your toes)

And stems

(slide your hands from your legs to  
your chest)

And leaves

(extend arms and open hands)

Flowers,

(spread fingers and hold them high)

Fruits,

(form a ball with your hands)

And seeds.

(wiggle your fingers)

You put them all together;

You have the parts of the plant.

(Repeat three times with  
greater energy each  
time!)

Try to use this song at least once a day. Ideally this song would be used to start the first lesson of the day, but it could also be incorporated as a good movement activity if the students are getting restless and having a hard time paying attention. Sing the song with the students and do the motion to model energy and encourage participation.
