Plant People

1. Drop a small handful of rye grass seed in the toe of some knee-high hose.
2. Add enough potting soil into the toe of the hose to make a ball of soil about the size of a baseball.
3. Tie a knot in the hose just above the ball of soil to keep the soil and seeds from falling out. This should look like a ball with a tail.
4. Soak the head in water for one minute. Then thread the tail into the mouth of the can and let the ball sit atop the can.
5. Recycle an soda can by washing it out and fill the can with water. Then cut out arms and legs from paper and tape them to side and botton of the can.

You can glue buttons and beads to create a face for your Plant Person and sit him in a spot that gets light.

In a few days, his hair will begin to grow. Then your only problem will be having to keep his hair cut!
